The most important Vietnamese legal documents regulating data protection are the Cybersecurity Law and Network Information Security Law. Cybersecurity laws in other jurisdictions that were inspired by the GDPR of the EU, the Cybersecurity Law of Vietnam shares similarities with China’s Cybersecurity Law enacted in 2017. The law focuses on providing the government with the ability to control the flow of information. The Network Information Security Law enforces data privacy rights for individual data subjects.

A draft Decree detailing a number of articles of the Cybersecurity Law (“**Draft Cybersecurity Decree**”), notably including implementation guidelines for data localization requirements, together with a draft Decree detailing the order of and procedures for application of a number of cybersecurity assurance measures and a draft Decision of the Prime Minister promulgating a List of information systems important for national security, are being prepared by the Ministry of Public Security (“**MPS**”) in coordination with other relevant ministries, ministerial-level agencies and bodies.

MPS has drafted a Decree on personal data protection (“**Draft PDPD**”), which is contemplated to consolidate all data protection laws and regulations into one comprehensive data protection law as well as make significant additions and improvements to the existing regulations. The Draft PDPD was released for public comments in February 2021 and was originally scheduled to take effect by December 2021. The Finalization process consuming much more time than the MPS first anticipated. PDPD was finalized and was coming in force 07/2023.
